Helen Website Feedback:

Lincoln

1. The logo is too small on the landing page
2. “10% off” pop up, make sure people don't abuse that. And does the 10% include everything in store, or is it specific to a certain product or service?
3. Scarborough description” no rentals or snowboards,” delete that sentence, and do not mention it
4. Lincoln home page. Rodgers is smaller than “Lincoln, New Hampshire,”
5. “This is the store for skis, snowboards, rentals” is better than “this is the store for rentals…”
6. Redo the department descriptions to better fit the kind of store Lincoln is.
7. “Service and tuning Lincoln” landing page, right below, is a description about Monty, which could just be deleted
8. “Rentals in Lincoln” should not have anything to do with Scarborough's leasing program
9. Don't include “DB” brand for bag brands we carry
10. Gloves and mittens brands to add: Level, Reusch, Leki
11. Don't separate men's and women's and kids' apparel
12. We don't carry the brand “Almgwant”
13. Calling the sections “layers” into “base layers”

Scarborough

1. Remove the sentence below the weather on the overview page
2. Rephrase the “the area ski and bike shop” description to talk only about Scarborough and less about what makes the stores different from each other
3. Maine skiers go to Sugarloaf, and Sunday River and those are on the coast
4. Scarborough doesn't have a race
5. They don't carry Vandeer, Kastle, or Armada. Include Dallbello, Technica, and other boot brands they carry

Amanda's feedback:

1. Change both appeal pictures to something that highlights a matching kit
2. Spider for kids appears
3. Make the appeal brands list together. Except for children
4. Replace hot chilis karitraa
5. The accessories picture is blurry
6. We do not carry Hotronic heated socks anymore.
7. We do carry the hotronic heated insoles. To take its place, we can put Hestra heated gloves/mitts.
8. Change the atomic goggles to a different brand of goggles since the atomic helmet is already showcased

Jamies feedback:
I would update the photo with junior lease for Scarborough with an image of maybe one of the techs setting up a lease package or something showing the lease program. Currently showing their adult ski wall

Under the tuning service page it has USSA ski prep listed which could be deleted. And the Junior race prep could be updated to be priced at $89 (double check with Sean I think that was what we finalized for price)

Under the race tab only note and not a major priority would be changing the image to an alpine racer. Currently has a Xc racer.

Overall I think pricing breakdowns on race/bootlab/tuning tabs are great and easily legible. The FAQs are on point and hopefully would alleviate common questions that would have to be answered via phone. (Maybe as we see trends of questions from parents we can add more)

Also the buyers guide is a great option as of right now. Let's look through the product line running through a few updates. Some skis have changed names and may be easier to do over the phone or in person sometime.

John Saffo:
Check the ussa boot prep price . Should be $200. (RSS race Boot sale) and possibly include services that you get for free when you purchase a Boot from Rodgers , this does not include race boots #1 skilled certified Boot fitters #2 no sales tax in New Hampshire #3 no charge certified binding adjustment and electronically torque tested binding release check and if needed compatibility changes to the boot sole,(this is always done on the spot while you wait) #4 we stand behind our fit , we will make adjustments, modifications to liners and shells at no charge , to ensure your boots, comfort and performance,for up to two years after the sale . Also for some services we can do a pick up in Scarborough for services to be completed in Lincoln and delivered to Scarborough in roughly a two week time span ,ski tuning, Boot lifters. And specific modifications . I would also encourage people to call rather than email , and give the the prompt on our telephone to get the Ski department. personalized service.

Dave:
No leasing/rentals on the website

Sean:
Regarding the website, please remove all buttons and references to booking anything online, rentals, bootfittings, etc
